Setting up the project:

Built-In RP:

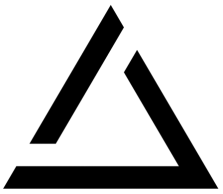

1. Go to *Edit >> Project Settings >> Player >> Other Settings* and set Color Space to **Linear**
2. Install the "**Post-Processing**" package from the Package Manager

URP:

1. Go to *Raygeas >> Grasslands - Stylized Nature >> URP Packages* and install the **URP support package** according to your Unity version
2. Enable **Opaque Texture** in your URP asset or set the "**Grasslands_URP_Asset**" as default (*Edit >> Project Settings >> Graphics >> Scriptable Render Pipeline Settings*)

Unity 6:

- If you're using Unity 6 and the player controller isn't working in the demo scene, go to *Edit >> Project Settings >> Player >> Other Settings* and set **Active Input Handling** to **Both**.
